With Crop Boost

Benefits of YaraVita Crop Boost

Contains 4 key nutrients that help to unlock hidden yield potential of maize.

1. Starter phosphorous important for;
 - Fine root growth and development – that help the crop absorb more fertilizer and water for quick growth
 - Enhances the crops ability to withstand long periods of drought
2. Vegetative growth – Promotes large green leaves important for food manufacture in maize ensuring the crop remains healthy throughout
3. Long lasting Phosphorous - Provides extended availability of phosphorous, important for flowering and grain filling in maize
4. Enhances development of bigger grain size and weight
5. Easy to mix and apply with a wide range of agrochemicals
